France Calls 70,000 For Army in Algeria

PARIS, Tuesday (UPI).—President René Coty is making one of his rare appearances at a Cabinet meeting tomorrow to put the seal of approval on a plan to rush 100,000 reinforcements to Algeria by early May.

The action was called to formalize yesterday's decision to recall 70,000 men to active duty and detach an additional 30,000 troops from France's depleted divisions in Germany and garrison forces here.

The Cabinet is prepared to call up another 50,000 men in a "second wave" if the situation seems to require it. The urgency of the problem was emphasized by reports from Algeria, where French troops fought Arab guerrillas for four days and nights over the week-end in the first real battle of the Algerian conflict.

The rebels, who normally fire a few shots at a time, and then flee into the hills, stood and fought a sizable French force, despite losses estimated at over 120 men before they fell back. The French lost at least 40 killed and 27 wounded.

The orders for the 70,000 reservists had been distributed to police stations throughout France and only a go-ahead signal from Paris is needed to start the mobilization.

Premier Guy Mollet made it clear to the Cabinet he has no intention of yielding to violence in Algeria, as France did in Morocco and Tunisia.

The idea of negotiating with rebels whose basic demands are independence and recognition of the Algerian nation is unthinkable," he said. "A million of our compatriots live on the French soil of Algeria. We cannot forget that."

Meanwhile, French Communists today launched a campaign for Algerian peace talks, which have been flatly rejected by Premier Guy Mollet.

Political quarters said there was no doubt the 150-strong Communist delegation to the National Assembly's largest single faction — will vote against M. Mollet when the Lower House discusses Algeria later this month.

The Assembly reassembled on April 17. Several influential members have announced their determination to question M. Mollet, and the Communists lately have grown increasingly cool to the Cabinet's Algerian policies.

Today, the party organ "Humanité," published an appeal of the front-line Comintern organization, Union of French Republican Youth (UFRY), denouncing Mollet's plans for a call-up of reservists.

The appeal ordered the nation to wage an "all-out struggle" against the Cabinet's mobilization plan.

Pakistan Raising Kashmir Issue in U.N. Council

KARACHI, Tuesday (Reuter).—The Government is taking "necessary steps" to reopen the Kashmir issue in the Security Council, according to a senior official source today.

The Government decided to return the problem to the Security Council after Prime Minister Nehru of India stated recently that the Kashmir plebiscite was now "largely out of the question."

The Kashmir issue—both India and Pakistan claim jurisdiction in Kashmir—is already on the agenda of the Security Council. A resolution was passed for a plebiscite to be held, India and Pakistan were given an opportunity for direct negotiations to implement the resolution.

Dulles Meets Congress Leaders On Possible Mid-East Action

WASHINGTON, Tuesday (UPI).—Secretary of State Dulles discussed with high congressional leaders to-day the question of congressional authority to cope with the Middle East crisis.

Mr. Dulles, however, did not request any legislative action at this time.

The nature of the congressional authority discussed was not disclosed, but there was speculation it referred to possible stand-by authority for the President to send American troops into action in the Middle East if necessary to keep the peace.

Mr. Dulles called the urgent conference with 14 congressional leaders. The congressmen refused to give any details after the 90-minute talks were completed. But Sen. Edward Brooke, Rep. John W. Wilson, Rep. George H. Mahon, and Sen. William Knowland, confirmed the statement.

However, Sen. Walter George, Chairman of the Senate Foreign Relations Committee, observed: "There was no request for any legislative action."

More Attraction Needed For Army Careers—like

AUGUSTA, Georgia, Tuesday (UPI).—President Eisenhower today called on Congress to make military careers more attractive and expand the U.S. power for peace" by a bigger flow of volunteers to the armed forces.

He sent a letter to Congress from his holiday headquarters, asking for speed approval of an improvement program proposed by the Secretary of Defense Charles Wilson. He said, "The loss of trained personnel continuing to be the most extravagantly expensive and disruptive obstacle to the strengthening of our armed forces today."

The programme calls for a better benefits system for dependents of dead service men, medical care for all dependents of military personnel, career incentives for medical and dental officers and improved housing in the officer grading system.

Britain Assures Japan On Nuclear Tests

LONDON, Tuesday (UPI).—Britain gave Japanese assurances in a formal note today that she will take "every precaution" in any nuclear tests in the Pacific area, official sources disclosed.

The note was handed by Lord Reading to the Japanese Ambassador, Mr. Hirokiko Nishi, at the Foreign Office today, a spokesman said.

Details of the note were not officially disclosed, but it was understood that it replied to earlier Japanese queries on the possible dangers from the nuclear tests.

is the mission of Mr. Dag Hammarskjold, U.N. Secretary-General, (left) shown above on his arrival yesterday morning at Lydda Airport for a five-hour stay. He flew into Israel to consult with Maj.-Gen. E.L.M. Burns, Chief Truce Supervisor. In the afternoon they flew on to Cairo. Photo by Rubinger

U.N. Chief Confers With Burns In 5-Hour Israel Stop-Over

By MOSHE LEVIN, Jerusalem Post Reporter

Mr. Dag Hammarskjold, the U.N. Secretary-General, spent five and a half hours in Israel yesterday in preparation for a week's visit to Cairo and other Arab capitals. His white, twin-engined plane touched down at Lydda Airport at 9:35 a.m. after an hour's flight from Beirut, and took off again at 3:30 p.m. for Cairo.

HAMMARSKJOLD OPENS PARLEYS IN EGYPT

CAIRO, Tuesday.—The U.N. Secretary-General, Mr. Dag Hammarskjold, arrived here by air from Israel today. He was accompanied by Maj.-Gen. E.L.M. Burns, Chief of Staff of the U.N. Truce Supervision Organization.

Mr. Hammarskjold early this morning met with Gen. Muhammed Farouq, head of the War Ministry's Palestine Affairs Department, and Col. Salih Gohar, head of the War Ministry's Palestine Affairs Department, who returned last night from U.N. Headquarters. Gen. Burns was present. Mr. Hammarskjold will meet Premier Abdul Nasser tomorrow.

The Secretary-General arrived at Lydda airport last night after its pilot had heard a B.R.C. broadcast about suspected terrorist activities at Cyprus' airfields. The boxes, which were not on the aircraft's freight list, were taken off the plane.

The plane, of the Scottish Airlines, took off again for London without the boxes at noon today.

Pakistan Raising Kashmir Issue in U.N. Council

KARACHI, Tuesday (Reuter).—The Government is taking "necessary steps" to reopen the Kashmir issue in the Security Council, according to a senior official source today.

The Government decided to return the problem to the Security Council after Prime Minister Nehru of India stated recently that the Kashmir plebiscite was now "largely out of the question."

The Kashmir issue—both India and Pakistan claim jurisdiction in Kashmir—is already on the agenda of the Security Council. A resolution was passed for a plebiscite to be held, India and Pakistan were given an opportunity for direct negotiations to implement the resolution.

Bourguiba Asked To Form Tunisian Gov't

TUNIS, Tuesday (Reuter).—The Bey of Tunis today called on Habib Bourguiba, the moderate nationalist leader, to form a government in succession to that of Tahar Ben Ammar, who resigned as Premier yesterday.

Dulles Meets Congress Leaders On Possible Mid-East Action

WASHINGTON, Tuesday (UPI).—Secretary of State Dulles discussed with high congressional leaders to-day the question of congressional authority to cope with the Middle East crisis.

Mr. Dulles, however, did not request any legislative action at this time.

The nature of the congressional authority discussed was not disclosed, but there was speculation it referred to possible stand-by authority for the President to send American troops into action in the Middle East if necessary to keep the peace.

Mr. Dulles called the urgent conference with 14 congressional leaders. The congressmen refused to give any details after the 90-minute talks were completed. But Sen. Edward Brooke, Rep. John W. Wilson, Rep. George H. Mahon, and Sen. William Knowland, confirmed the statement.

However, Sen. Walter George, Chairman of the Senate Foreign Relations Committee, observed: "There was no request for any legislative action."

Israel Blames Egypt In Note to Council

UNITED NATIONS, Tuesday, April 11 (UPI).—A formal note from Israel to the Security Council, in a letter to the Secretary-General, charged that Egypt was responsible for the recent acts of terrorism in the Gaza Strip.

Israel in the letter also officially notified the Council of its statement to Prime Minister David Ben-Gurion, Gen. Burns, reserving Israel's freedom of action unless Egypt unreservedly gave assurances of refraining from all hostile acts.

Israel blamed the Egyptian High Command for the numerous deaths of Egyptian civilians in Gaza by setting up an aggressive "military operation" in isolated areas "in reckless fury and wanton disregard of human life."

Listing 19 separate acts of aggression since last Thursday, the Israeli letter said that the "accelerated pace and expanding scale of Egyptian aggression at the very moment when the Secretary-General of the U.N. is due to arrive on a mission of peace, must inevitably give rise to grave apprehension" regarding Egypt's intentions, and to serious concern for the prospects of avoiding war in the Middle East."

The Egyptian letter stated that Israel had committed "one of the most atrocious aggressions ever having taken place."

AFTER MIDNIGHT

Favel Yedin, M. Soviet Minister of Building Materials, died yesterday. TASS reported. He was also an alternate member of the Central Committee of the Soviet Communist Party.

ITALY SUMMONS MID-EAST ENVOYS

ROME, Tuesday (Reuter).—The Government has summoned its diplomatic representatives in the Middle East to a conference in Rome on the situation in that area.

Siren Test In Tel Aviv Area

Air raid sirens will be tested today at noon in Tel Aviv, Bnei Brak, Ramat Gan, Givatayim, Ramat Yishai, Jaffa, Haifa and Beer Sheva. The test will be one blast of three minutes' duration; in the event of an air attack, the signal will be a warning siren for three minutes.

Two More Marauders Killed; Sent by Hafez, Captives Admit

Saboteurs Told To 'Deny Everything'

TEL AVIV, Tuesday.—Three wounded Egyptian infiltrators in an Israeli hospital today told reporters that they had been ordered to cross into Israel by the Egyptian Colonel Hafez to sabotage water installations and bridges. They denied that their mission was to kill, and declared that they had decided not even to carry out sabotage, but to cross into Jordan instead.

Asked what instructions he had in case of capture, Muhammad said: "We were told to deny everything."

They were wounded when an Israeli Army force surrounded their group and killed some of them.

The youngest of the wounded Egyptians was a dark-skinned man of about 18. He gave his name as Abu Helo. He said his father owned a tobacco shop in Rafa. He was drafted into the fedayeen group by force, for Colonel Hafez's men threatened him and his family. "You are not going to expect Egypt to send us here to defend you," he told his captors. "Send the Herrenvolk up to us." Hafez was trained, and he is not a good walker, and was left behind in the fields by his comrades. He had just no time to carry out any sabotage before he was caught.

The广播 said:

"....The Israelis believed that the Egyptian saboteurs would not stop there and that the infiltration of any military forces into Israel would bring about the intervention of the Great Powers."

Operations carried out on the fedayeen on Saturday last put an end to the quiet enjoyed by the saboteurs across the border.

The fedayeen were able to open fire and to throw hand-grenades in the centre of the town and the local landmarks.

The incident has extraordinary significance because the war is not now confined to firing or attacks along the border but has spread into the interior of Israel and places which were believed to be safe from all danger.

Following these incidents, the whole of the Negev is a state of emergency and strict curfew is in effect. The inhabitants were ordered not to leave their houses after sunset. Indeed, the quiet reigning in the villages and towns of the Negev since armistice day has turned to terror and fear.

The incidents occurred to open fire and to throw hand-grenades in the centre of the town and the local landmarks.

The广播 said:

"....The Israelis believed that the Egyptian saboteurs would not stop there and that the infiltration of any military forces into Israel would bring about the intervention of the Great Powers."

Scientists Air Practical Uses of Basic Research

From a Special Correspondent

One of the first advantages likely to accrue to the State of Israel from the International Symposium on Macromolecular Chemistry, which has just closed its sessions at the Weizmann Institute of Science in Rehovot, is a keen interest overseas in the practical application of fundamental research here.

The 114 scientists who were registered as attending the conference included many who serve in industries in their respective countries, and as such are familiar with the complex processes of translating the findings of fundamental research into industrial production.

Some twenty delegates are from the Symposia on the staffs of a dozen large American, British, French, Italian and German corporations of world reputation.

Intense interest was shown in the work being done in the Polymer Research Department of the Weizmann Institute by the Shabtai brothers, who are one of the foremost figures in the polymer science world.

Prof. Herman F. Mark, of the Brooklyn Polytechnic Institute, demonstrated in the opening lecture of the Symposia that there is no limit to the practical industrial uses of what may be described as "the chemistry of plastic substances."

Household Synthetics

Heat-resistant fabrics, new fibres, tableware, artificial fibres, a variety of household articles, a wide range of products for which the traditional raw materials may now be replaced by synthetic — all these lie within the practical compass of this newest and most fascinating branch of scientific research.

Prof. Mark, who has been Chairman of the Weizmann Institute's Planning Committee since 1948 and is among its first Honorary Fellows, has taken a keen and particular interest in the Institute.

A reception for Mr. L. Gottlieb, director of the BBC Hebrew service, and Mrs. Gottlieb was given on Monday by Mr. R. Gamble, Information Officer of the British Embassy, and Mrs. Gamble at their home in Zichron Yaakov.

Members of the International Technical Panel on Wood Chemistry of the U.N. Food and Agricultural Organization yesterday visited the American-based Paper Manufacturers in Hadar. A reception for the visitors was held later by Mayor Y. Widaker.

On Saturday night, April 14, 1956, all public rooms of the Academia Grand Hotel will be open to Yom ha-Zikaron, the occasion of their Independence Day Ball under the patronage of Mrs. Rebecca D. Soffer. For reservations and details please apply to the Academia Grand Hotel, phone Tel Aviv 4327/8/9.

Mr. Isaiah Berlin, Fellow of All Souls College, Oxford, will deliver the second of this year's two Orde Wingate Memorial Lectures at the Hebrew University at 8.30 tonight, in Room 73, Ratson Building. Subject: "Two Concepts of Political Thought."

Rabbi G. Plant, of the U.S., is to address the Haifa Rotary Club today.

An exhibition of paintings of the Western Galilee and Galilee by the artist Samuel Katz will be opened on Saturday at 11 a.m. at the Municipal Museum in Acre.

Bond Pledges From New Jersey

The Minister of Finance, Mr. Levi Eshkol, yesterday received two visiting leaders of New Jersey Jewish communities who presented him with scrolls pledging their communities to buy more than \$300,000 in Israel Development Bonds this year.

Mr. Adolf C. Robison, a member of the City Council of Teaneck, N.J., and president of the local Jewish Community, handed the Minister a pledge for \$200,000 in additional Bond purchases in 1956.

Mr. Robison has personally made investments in Israel and is also a member of the Board of Directors of the Palestine Economic Corporation.

Mr. Isidore Aaron, honorary Chairman of the New Brunswick and Highland Park Committees of the Israel Development Bond Drive, presented Mr. Eshkol with a scroll pledging his community to buy another \$150,000 of Bonds this year, in addition to the \$240,000 it has already purchased.

The Minister also received Mr. Samuel Neiman, the newly-appointed Director of Israel Bonds for Europe. They discussed ways of intensifying the Bond campaign in West European countries.

DRAFT LAW ON PROPERTY TRANSFER

A draft law to regulate the transfer to municipal ownership of public property registered in the name of private persons or firms is now being worked out by the Ministry of Interior.

During the Mandate, many undertakings, including water works, schools, were registered in this way, since the local authorities had no right to establish them.

If compensation or severance money is due to the registered owner, the exact amount will be fixed by the Ministry. Appeal can be made to the District Court.

The law specifically exempts the transfer of religious institutions.

JOURNALISTS IN PEA

The Soviet Union was the only invited country absent when a five-day conference to discuss ways of improving training for journalists opened in Paris yesterday. The U.N. Educational, Scientific and Cultural Organization (UNESCO) which sponsored the conference said no entry was received to the invitation to Russia.

The Independence Day

1956 stamp, shown above, goes on sale tomorrow. In green, blue, dark brown and yellow, the stamp has a face value of 150 pruta. The national colours are flying in the form of a figure "7," commemorating eight years of statehood. The stamp was designed by the Shamim brothers of Tel Aviv.

Greetings to Citizens

An Independence Day greeting card has been sent to all Israeli citizens by Prime Minister David Ben-Gurion, in the name of the Government. The six-page folder, in green and white graphically illustrates the changing tempo of the tempo of living and the flow from rural to urban areas have stirred up strain and tension, not only among individuals, but also between societies and countries. Such abnormalities as dyspepsia, duodenal ulcers and coronary disease are sharply on the increase, while maladjustment causes 30 per cent of sickness absenteeism in industry, and delinquency and drug addiction are similarly increasing.

The layout was prepared by Mass Advertising, the drawings by Alex Borinsky and the printing by the Government Printer.

Sunderland, Rampala Juniors Play Here in May

TEL AVIV, Tuesday. — The English First Division football team Sunderland and Rampala Juniors, of Uruguay, one of the foremost centres of polymer research in the world.

In this branch of world science that is rapidly establishing a new range of materials for industry, the role of the Weizmann Institute and its Polymer Research Department assure the State of Israel a place in the front ranks of what — to the laymen in all walks of life — promises to be "vast new world of wonderful plastics."

Private conferences on the possibility of financing definite research projects at the Weizmann Institute were held at a concluding "social evening" given at the home of Mr. and Mrs. W. Weiloff at Rehovot at the end of the sessions. There is a strong likelihood that the research projects and fellowships will make the Institute one of the foremost centres of polymer research in the world.
